Fiscal Harmony

Planning your future for a financially free life.

Statement of the Problem

Many Filipinos struggle to achieve financial independence due to limited financial literacy, insufficient resources for tracking income and expenses, and outdated government financial information. A significant portion of the population lacks foundational knowledge about budgeting, savings, and debt management, leading to paycheck-to-paycheck living, inadequate savings, and debt mismanagement. Despite available tools, the lack of accessible, updated financial information combined with time constraints makes it challenging for individuals to form good financial habits and understand essential aspects of their finances, such as tax regulations and economic planning.

Purpose?

Fiscal Harmony aims to address these issues by offering a comprehensive personal finance management tool that empowers Filipinos to improve financial literacy, build healthy financial habits, and take control of their finances. The app combines a detailed budgeting tool, income and expense tracking, and an savings planning, all designed to promote responsible financial management. Fiscal Harmony also provides updated financial insights and educational resources, enabling users to make informed decisions and plan for long-term financial stability. By bridging the financial literacy gap, Fiscal Harmony supports users on their journey to financial independence and economic well-being.
